BOREALE AMETHYST VASE, SEGUSO VIRO

1.200,00 €

This object is part is part of the Borealis collection, created in the late 1990s by Seguso Viro, transforms a nuance of four color tones into a series of refined and colorful objects. The technique is achieved by superimposing crystal on colored powders, which create unique reflections reminiscent of the aurora Borealis. The Boreal collection was made in various shapes that can be displayed well together, creating a series of objects in harmony.
