

CRYSTAL CLEAR SCAVO FISH

8.900,00 €

Bring timeless artistry into your space with this exquisite handcrafted glass sculpture, elegantly depicting a fish poised on its base. Made from crystal clear glass, this sculpture is finished using the traditional Scavo technique, a traditional Murano process that recreates the charm of ancient, unearthed treasures.

By applying a blend of mineral powders to the hot glass surface, the Scavo technique creates a beautifully aged, matte texture, evoking the allure of objects discovered in archaeological excavations. The result is a piece that feels both historic and contemporary, embodying the spirit of Venetian craftsmanship.

This reinterpretation of a classic Muranese motif transforms a traditional subject into a unique collector's item, perfect for adding character, depth, and sophistication to any room.
